

Osmaston Primary School Sport Premium Allocation

What is the Sport Premium Funding?

In order to 'Inspire a Generation' after the 2012 London Olympic Games the government pledged £150,000,000 of Sport Premium funding per annum to primary schools. This money was to be used purely on Physical Education (PE) in order to promote healthier lifestyles, raise achievement in PE lessons and to inspire children not yet engaged in PE.

The money, £8000 per school, plus some extra depending on the number of children in the school, was initially for one year but has now been extended for a further 4 years.

In 2017, due to cross-party commitment to sports funding and increased concerns over general fitness levels and childhood obesity, this funding has been doubled.

How can the Sport Premium be used?

Schools can use it to:

- employ experts to train staff to have more expertise and confidence delivering PE
- employ specialist sports coaches to help increase the skill level of staff delivering PE and sport in school
- support the leadership and management of PE
- increase the facilities and equipment for PE and sport in school
- develop extra-curricular sports clubs
- work in partnership with other schools
- enter more competitions

Sport Premium Allocation 2017 – 2018

For the academic year 2017 – 2018 Osmaston Primary School will receive **£22,000** of the Sport Premium funding (£16,000 + £10 per pupil)

The following main foci for how we are using our Sport Premium funding are identified:

- the employment of additional Premier Sports coaches to run competitions and to increase pupils participation in inter- school competitions
- employ Premier Sports coaches to carry out Fitness measure assessments for pupils in Years 1 to Years 6 (autumn term 2 and summer term 2)
- raising the achievement and motivation of pupils during play time and lunchtime by training Year 2 and Year 5 Mini Leaders
- developing intra school competitions from FS2 to Year 6

- improving Year 4 and 5 writing skills by introducing Pobble
- enhancing FS1 Physical Development provision
- increasing general levels of activity and fitness across the whole school.

Focus	Work Undertaken	Year Groups	Total Cost
Professional Development Attainment and Motivation of Pupils	Employment of two external PE specialist provider to deliver focused outdoor learning/physical development opportunities in FS1 One day per week	FS1	£840 per term £2520

FS1 – Year 6 Staff CPD Parent Links	£1500
		Total so far	£20,700
		Left to spend	£1,300

The Expected Impact

The following is the anticipated impact against our main foci:

- the employment of additional Premier Sports coaches to run competitions and to increase pupils participation in inter- school competitions – more children will want to participate as

enjoyment levels increase, leading to an overall increase in the percentage of children who participate in sport regularly.

- employ Premier Sports coaches to carry out Fitness measure assessments for pupils in Years 1 to Years 6 (autumn term 2 and summer term 2) – this will allow us to monitor how fit our pupils are.
- raising the achievement and motivation of pupils during play time and lunchtime by training Year 2 and Year 5 Mini Leaders – more children will want to participate as enjoyment levels increase, leading to an overall increase in the percentage of children who participate in sport regularly.
- developing intra school competitions from FS2 to Year 6 – more children will want to participate as enjoyment levels increase, leading to an overall increase in the percentage of children who participate in sport regularly.

Making Improvement Sustainable

The foci for our spending ensures that we are on the way to establishing a long term culture within the school where sport and activity is valued and recognised as one of many ways to maintain good health. As staff become more skilled at PE as result of the sports premium spending, this will enable them to embed more sporting activities into the curriculum and extra-curricular activities that are offered.
